Natural joint health
support for your cat

YuMOVE[®] Cat

Triple-action joint support
for stiff and older cats

YuMOVE Cat is a unique combination of high-strength ingredients to support joint function and promote mobility. It's phosphate-free, fast-acting and easy to feed.

Sourcing and strength make all the difference – ActivEase[®] Green Lipped Mussel contains 4x more active Omega 3 than standard versions. See why that makes a difference at www.lintbells.com/activeease

AIDS STIFF JOINTS

ActivEase[®] Green Lipped Mussel from the crystal-clear waters of New Zealand provides a guaranteed, super concentrated source of Omega 3 fatty acids, which aid the natural anti-inflammatory action of the cat's metabolism to soothe stiff joints.

SUPPORTS JOINT STRUCTURE

Glucosamine provides the major building blocks of cartilage – the tough connective tissue that protects the joint. Natural Chondroitin from ActivEase[®] Green Lipped Mussel maintains healthy joint structure. Manganese supports collagen formation in the cartilage, tendons and ligaments.

PROMOTES MOBILITY

Hyaluronic Acid is a major part of synovial fluid, which helps lubricate and cushion the joint. Natural antioxidant Vitamin E neutralises free radicals, helping to maintain joint mobility.
