

YUCALM[®]

Lintbells[®]
Veterinary

Remember, remember, your dog **BEFORE** this November!

Prepare before fireworks season

1. Ask your vet to refer you to a behaviourist to work up a bespoke treatment plan.
2. Give them YuCALM to help reduce your pet's anxiety, starting the product 2-3 months before firework season.
3. Make a den 2-3 weeks before, ensuring it is a covered 'safe space' making it comfortable, dark and away from windows.
4. Do as much as you can to reinforce that the den is a great place to be!
5. Add lots of blankets and cushions to the den to reduce the impact of loud noises.

Ask your vet how
YuCALM can help
this firework season.

Top Tips during fireworks season

1. Take your dog for a walk and let your cat out earlier before it gets dark. Keep your dog on a lead in case something does scare them.
2. Close blinds and curtains and keep your lights on to minimise the impact of flashes from outside.
3. Play music or have the TV on.
4. Comfort your dog or cat if they are worried about fireworks or other sounds so long as you don't give more fuss than normal.
5. Encourage them to use their den, offering them treats such as a stuffed Kong, a Lickimat or a puzzle feeder to distract them.
6. Reward any relaxed behaviour, offering treats and physical attention.

When to use YuCALM?
